

Solution Architecture Design

Date	30 June 2026
Team ID	
Project Name	Rising Waters - Flood Hazard Forecasting System
Maximum Marks	4 Marks

1. Model-View-Controller (MVC) Structural Layers

Layer	Architectural Responsibilities
Model Layer	Compiled StandardScaler coefficients and zero-dependency decision tree rules.
View Layer	Responsive Jinja2 templates (frontend/) with custom navy stylesheet (static/css/main.css).
Controller Layer	main.py API handlers and route validations intercepting inputs and returning JSON payloads.
