

Scalability & Future Plan

Date	30 June 2026
Team ID	
Project Name	Rising Waters - Flood Hazard Forecasting System
Maximum Marks	4 Marks

Expansion Area	Technical Scalability Strategy Outlined
Live Weather API	Connect backend directly to OpenWeatherMap API to auto-fetch cloud and rain metrics.
Geospatial Mapping	Integrate Mapbox web interface layers showing active localized inundation areas.
SMS Warnings Relays	Link Twilio communications API to push text warning messages automatically to relief teams.
Advanced ML models	Evaluate temporal LSTM pipelines utilizing continuous rainfall time-series logs.
