

Project Initialization and Planning Phase

Date	30 June 2026
Team ID	XXXXXX
Project Name	Rising Waters – AI-Powered Flood Prediction and Early Warning System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am Disaster Management Authority / Coordinator	I'm trying to Predict localized flood hazard risks in advance	But Hydrodynamic simulations take too much time	Because Historical weather & monsoon data is complex to analyze	Which makes me feel Anxious about community safety & response delays
--	--	--	--	---

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Disaster Management Authority / Coordinator	Predict localized flood risks and issue early warning alerts	Conventional hydrodynamic forecasting takes hours to calculate watershed overflow	Meteorological weather data must be validated and classified in real-time	Urgency to deploy a Machine Learning classification model on a Flask web application
