

Project Demo Planning

Date	30 June 2026
Team ID	XXXXXX
Project Name	Rising Waters – AI-Powered Flood Prediction and Early Warning System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Explain the flood prediction concept, threat factors, and project objective	1	Pravallika Relli
2	Dataset Overview	Show weather parameters dataset, correlation heatmaps, and preprocessing	2	Pallavi Sowreddi
3	Model Training	Explain the XGBoost Classifier model, training pipelines, and comparison	2	Pallavi Sowreddi
4	Web Application	Demonstrate Flask multi-page dashboard, logs page, and API routes	2	Niha Niha
5	Live Prediction	Enter weather parameters, show prediction results, and input validation	3	Pallavi Sowreddi & Niha Niha
6	Conclusion	Summarize prediction achievements (96.55% accuracy) and future plans	2	Pravallika Relli

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why Flood Risk prediction is important.
2	Solution Overview	Briefly explain dataset, XGBoost Classifier, and Flask architecture.
3	Live Feature Demonstration	Show the application predicting Flood Risk using sample inputs.
4	Q&A Session	Answer questions and discuss possible future enhancements.
