

Customer Journey Map

User Journey Phases

Mapping the steps a coordinator takes when interacting with the system during monsoons:

1. Weather Monitoring Phase

- Action: Collects rain readings.
- Pain Point: Messy manual Excel logs.
- Solution: Simple form inputs on the web app.

2. Validation & Sanity Phase

- Action: Submits numbers into the predictor.
- Pain Point: Human typos (e.g. entering negative precipitation).
- Solution: Real-time range checks and seasonal total validations.

3. Model Analysis Phase

- Action: Waiting for predictions.
- Pain Point: Heavy network latency.
- Solution: Inline spinner transitions, response calculated in < 1ms.

4. Evacuation Phase

- Action: Reviewing hazard logs.
- Pain Point: Unclear warning advice.
- Solution: Detailed Risk Audit Report lists exact reasons for risk levels.
