

Proposed Solution Blueprint

1. Architecture Overview

A multi-page Flask application running as a serverless instance. The client-side dashboard provides bento widget summaries, while the predictor page provides interactive classifications with inline logs.

2. Page Routing Blueprint

- '/' (Home): Dashboard showing accuracy, features, and active scenarios.
- '/predictor' (Predictor): Validation forms and historical prediction logs.
- '/docs' (Documentation): Confusion matrix specifications.
- '/portal' (Project Portal): Interactive workspace file viewer.
