

Code-Layout, Readability & Reusability

1. Repository Folder Structure

A clean layout ensuring high reusability:

- main.py: Main web server script.
- app/preprocess.py: Dictionary parsing rules.
- frontend/: Jinja2 template folder.
- static/assets/: CSS, JS, and mockup files.
- models/: prediction logs JSON files.
- project documentation/: internship reports.

2. Code Quality Guidelines

- PEP 8 standards followed.
- Robust docstrings documenting variables and functions.
- Custom exceptions handling for server-side prediction failures.
